CONTACTS 2010

The Natural Environment Research Council (NERC) funds independent environmental research in the United Kingdom. The priorities we develop with our researchers and stakeholders provide a focus for the marine, polar, atmospheric, earth, terrestrial and freshwater science communities. We receive public funding, but remain independent of government and have a budget of around £400 million a year.

In November 2007, we launched our five-year strategy *Next Generation Science for Planet Earth 2007-2012*.

NERC's strategic goal

To deliver world-leading environmental research at the frontiers of knowledge:

- enabling society to respond urgently to global climate change and the increasing pressures on natural resources;
- contributing to UK leadership in predicting the regional and local impacts of environmental change from days to decades; and
- creating and supporting vibrant, integrated research communities.

Science themes

- Climate system
- Biodiversity
- Natural hazards
- Sustainable use of natural resources
- Environment, pollution and human health
- Earth system science
- Technologies

02 The organisation

NERC's Chief Executive, Professor Alan Thorpe, is responsible for the day-to-day running of the organisation. The governing Council is chaired by Edmund Wallis.

The NERC Executive Board, chaired by Professor Thorpe, oversees corporate management and directs, develops and implements Council's strategies, policies and decisions. Its members include directors of NERC's research centres and collaborative centres.

The Science and Innovation Strategy Board, chaired by Professor Duncan Wingham, develops NERC's integrated science strategy and prioritises new programmes and initiatives for Council's consideration and approval.
